CMAI Architects

PHOTOGRAPHER:
Geo Cloete

BUILDER:
Power Construction

EDEN TELECOM:
Fibre Optic & WiFi

JURY CITATION

The Thesen Island development highlights a great example of Restoration a brown field with historic ecological values. What has happened in this project is the innovative transformation of a sensitive site, with respect to social aspects and environmental aspects. This project is an exemplar of how a development can be designed and constructed so as to be both commercially viable but also co-exist with and enhance with environment. The aesthetic content is as remarkable as the process.
