OTHER CONSULTANTS/ IMPLEMENTORS/ CONTRIBUTORS:
Eden Telecom: Fibre Optic & WiFi

JURY CITATION

This concept of blending rural living with commercial agriculture and conservation areas is new and refreshing as a contemporary lifestyle integrating all mod cons and security. The project presents very powerful and unique approach with considerations of social and economic resilience in mind. In the context of rapid urbanization, the development of a farm village appears counter-intuitive but Crossways shows a viable solution and demonstrates that villages can be alternative enjoyable places for people to live, work, and play. The design shows the potential for and opportunity of resolving conflicting issues of agriculture and urbanization.
